

Addendum 3 to Newport Request for Sealed Bid Proposals Residential and Commercial Solid Waste & Recycling

This is the third response to questions from a prospective bidder. Full specifications and earlier addenda, visit the city website: <http://newportky.gov/City-Government/Procurement.aspx> .

The following was received from a prospective bidder after the close of business on Wednesday, April 5:

Can I have a little guidance on the commercial? Without knowing the level of service on the containers, can you give me what the City collected on the franchise fee in 2016?

1. Can I have a little guidance on the commercial?

To provide "guidance on commercial" collection, please refer to Addendum 2, Question 1, copied below* for convenience.

2. Without knowing the level of service on the containers, can you give me what the City collected on the franchise fee in 2016?

We do not have the past history requested. The specifications for sealed bid proposals are new this year and have been revised significantly. The prior bid process from ten years ago did not include a franchise fee.

*How many commercial accounts and industrial accounts?

Currently 84 customers are listed as commercial that receive rear load service with a trash cart.

As permitted by the current contract, there are (additional) commercial properties that mirror residential service as they simply have one or two carts. (Such as small businesses in the historic downtown area.)

The number of current customers that have front load containers for MSW is 171.

There are another 18 front load commingled recycling containers throughout the city.

There are several business that have recycling carts, currently through subscription service, these were included in the total of 416 participants listed in the response to current participation in Question 6 on Addendum 1.
